- **Family support for those dealing with loss.**

Objectives:

1. Provide an overview of a child's grief response as related to normal stages of child development from birth to 18.
2. Discuss methods to support and to raise level of comfort for those adults who may deal with grieving families as part of their workday or volunteer associations.
3. List issues to assist adult children as they learn to assess aging parents.

This program will focus on family issues faced during the holidays for residents in Montgomery County: families dealing with the illness or loss of a loved one, or coming home for the holidays and finding parents who are not able to care for themselves. Specific local community resources for families will be described as well as how to access them.
