

SEMINAR NOTICE

Department of Neuroscience, Cell Biology, and Physiology

Friday, September 18th
E163 Student Union
10:00 a.m.

David Natale, Ph.D., Assistant Professor of Genetics
Department of Comparative Biology & Experimental Medicine
Faculty of Veterinary Medicine, University of Calgary, Alberta, Canada
“Trophoblast stem cells and development: How to make a placenta.”
Host: Thomas Brown, Ph.D.

Friday, October 2nd
116 Health Sciences
2:00 p.m.

Stefan Feske, M.D., Assistant Professor of Pathology
New York University
“Store-operated calcium channels in health and disease”
Host: J. Ashot Kozak, Ph.D.

Friday, October 9th
116 Health Sciences
2:00 p.m.

Daniel Mulkey, Ph.D., Assistant Professor of Physiology & Neurobiology
University of Connecticut
“Chemical control of breathing: Role (or not) of background K⁺ channels”
Host: Christopher Wyatt, Ph.D.

Friday, October 16th
116 Health Sciences
2:00 p.m.

Stanley Misler, M.D., Ph.D., Associate Professor of Medicine, Cell Biology & Physiology
Washington University
“Biphasic insulin secretion: tuning recruitable granule pools to electrical activity?”
Host: J. Ashot Kozak, Ph.D.

Friday, October 30th
116 Health Sciences
2:00 p.m.

Joseph Margiotta, Ph.D., Professor of Neurosciences
The University of Toledo
“Synapses under the influence... . Consequences of neurotrophin & neuropeptide signaling”
Hosts: Kathrin Englisch, Ph.D., and J. Ashot Kozak, Ph.D.

Friday, November 6th
116 Health Sciences
2:00 p.m.

Christopher Norris, Ph.D., Assistant Professor
University of Kentucky
“Calcineurin: A dual threat in aging and Alzheimer's disease”
Host: Mark Rich, M.D., Ph.D.
