

Central Research Forum

In conjunction with Wright State University's 40th Anniversary celebration, the Office of Research Affairs at the Boonshoft School of Medicine will host the 2007 Central Research Forum on Tuesday, October 23, from 2:00-7:30 p.m. in the WSU Student Union. The program will explore future prospects for state and federal funding as well as promising new research initiatives at Wright State.

A poster session will showcase the range of Wright State's biomedical, clinical, and medical education research. All WSU investigators and graduate students are invited to present posters on their current or recent work. Posters presented at national conferences in the past year are strongly encouraged. This session is an opportunity to share your research with colleagues and potential collaborators in a stimulating, convivial setting.

The poster submission deadline is Monday, October 15. Please submit your poster information online at:
